

DISASTER RECOVERY MANAGEMENT SOFTWARE

Ensure Your Critical IT Applications are Recovery Ready.

Adopt a Life-cycle approach to DR Monitoring, Management & Reporting

Sanovi DRM is the first comprehensive DR Management software that enables IT organizations meet their Recovery service levels.

Sanovi DRM 3.1 is the latest release that offers the following features:

- Application level Recovery Point and Recovery Time monitoring
- DR solution health monitoring with alerts on deviations
- Automate execution of DR Drills
- Flip-of-switch application fail over and recovery
- Out-of-box DR solutions for industry standard databases and applications
- DR compliance reports

Reduce Application Down Time.

Non-availability of IT applications poses a huge business risk. In case of an outage, Sanovi DRM provides push-of-a-button automation to fail over and recover applications on the DR. Fail over automation enables recovery within business set Recovery Time objectives. Application recovery is predictable when operator error are eliminated and dependence on people is reduced.

Lower Cost of DR Operations.

The cost of DR operations - monitoring DR solution health, doing DR Drills and Reporting on Recovery readiness does not scale as the number of applications grow. Sanovi DRM central DR dashboard and alerts reduces the number of people required to monitor DR solution and enables IT to be pro-active. DR Drill automation allows teams to test multiple applications and recover complex applications within business set Recovery Time Objective.

Enable an Agile IT, Focus on Recovery Readiness.

IT automation is the cornerstone of an agile IT organization. Sanovi DRM delivers prepackaged recovery and drill automation for heterogeneous platforms and applications, that enable timely deployment of tested DR solutions. No longer is DR only for outages caused by acts of God, the new confidence enables you to switch to DR with agility and reduce the impact of planned and unplanned application down times.

FEATURES	BENEFITS
RPO & DR Health Monitoring	<ul style="list-style-type: none"> • Meet Recovery SLA by eliminating manual tracking of RPO and enabling quick response time to RPO deviations
DR Drill Automation	<ul style="list-style-type: none"> • Reduce time to execute DR Drills by over 80%, also reduce number of people required to do Drills. • Provides a scalable approach to ensuring DR readiness as the number of critical applications grow
Failover Recovery Automation	<ul style="list-style-type: none"> • Reduce dependence on people to recover applications on DR, eliminate operator errors and make the recovery predictable
Compliance Reports	<ul style="list-style-type: none"> • Satisfy regulatory authorities and audit with ready made reports that provides evidence of DR Drills and compliance to business set recovery SLAs
Central Management Console	<ul style="list-style-type: none"> • Provides a anywhere, any platform management of heterogeneous DR solution through a web-based user interface
Event Management	<ul style="list-style-type: none"> • Reduce risk-window with timely alerts of DR solution failure and deviation conditions.
Relationship Map	<ul style="list-style-type: none"> • A single place to track mapping of physical and logical relationship from the primary to DR site across all layers of the infrastructure and application stack
Best Practices DR Templates	<ul style="list-style-type: none"> • Adopt proven and tested best-practices DR solutions that enable on-time and within budget DR solution implementation

Attractive ROI.

Sanovi customers are realizing value by saving time and reducing risk. Without real-time monitoring and management, companies Return on Investment on DR hardware & software infrastructure can only be measured by doing planned DR drills. These drills are time and people intensive and result in a point in time state of your RPO/RTO capabilities. Sanovi customers realize great value in the ongoing real-time view into RPO/RTO as this provides for a realistic understanding of their risk in the event of an unplanned outage. Sanovi extends this view by enabling the automation of application recovery and DR drills. Sanovi customers are telling us that they have been able to establish a very attractive ROI based on the automation of a single DR drill.
